

WHY STUDY AT SMU SCHOOL OF ECONOMICS?

SMU

SINGAPORE MANAGEMENT
UNIVERSITY

“Your learning journey with us will equip you with the ability to ‘think like an economist’. You will develop the skills, content knowledge and structures that can be applied to understand and analyse issues ranging from global problems to problems encountered in everyday life.”

Professor Hoon Hian Teck
Interim Dean

Undergraduate

DEAN'S MESSAGE

Your choice of where to spend your undergraduate years is one of the most important you will make. Your experience during the next four years will have a strong impact on what you will do and how you will do it in the four decades that follow.

Since its millennial founding in 2000, SMU has successfully prepared students to be both “market-ready” and “future-ready”. No matter what their interests and choice of career path, we are proud that our graduates are well-equipped to enter the workforce and to handle the challenges of a complex and changing world.

In the School of Economics, your learning will be experiential. In our seminar-style classes you will gain confidence and understanding from active participation in discussions and group projects, and you will have courses in which a distinctive part of the learning experience is working in a team to solve real problems posed directly by stakeholders from the public or private sectors. You will have the advantage of interacting closely with our talented and experienced faculty who are actively contributing to the development of new knowledge and methodology.

Your learning journey with us will equip you with the ability to ‘think like an economist’. You will develop the skills, content knowledge and structures that can be applied to understand and analyse issues ranging from global problems to problems encountered in everyday life.

Our curriculum is both academically rigorous and flexible. It is designed to give you a foundation on which you can then layer more focused combinations of study according to your interests. The core of the Economics major provides a broad understanding of the scope of economics, the frameworks for organising thinking about economic questions, and the most commonly used methods for solving economic problems. Importantly for the world of ‘big data’, you will gain experience in using empirical techniques for the analysis and interpretation of economic data.

A wide range of elective courses will then provide you with more specialised knowledge in areas of your choice, whether they be the increasingly important areas of practice and policy such as healthcare, data analytics, urban economics or real estate, or more advanced courses such as international trade and finance, economic theory or econometrics that will prepare you for postgraduate studies and research.

Along the way you will have at least one internship and at least one significant overseas experience to further broaden and deepen your knowledge and understanding.

As a result of this comprehensive learning journey, our graduates are highly sought after. Most are employed by government agencies and private sector organisations such as financial institutions and consulting firms. Others use their economics training as the underpinning for entrepreneurial pursuits or as their entrée to postgraduate studies in leading universities around the world.

I look forward to welcoming you to our school. I am confident that your time with us will be a memorable stage on your road to success.

Professor Hoon Hian Teck
Interim Dean

Our rigorous curriculum is designed to train students to think about real-world issues and equip them with a unified method to solve them. Our students are empowered to read and anticipate both local and global trends with the robust framework of an economist.

Quantitative Knowledge to Solve Real-Life Problems

With strong foundation courses and elective courses designed for relevance, such as Real Estate Economics, Health Economics, Economics of Ageing, Economics of Politics, Empirical Industrial Economics, and Organisational Economics, which are rarely found in other undergraduate programmes, our students are exposed to a wide range of applications of economic principles to current global issues.

Broad Understanding of Society and Human Behaviour

Economics addresses questions in the social world with data and sound logical thinking. This is often facilitated by the use of mathematics or statistics, and we equip students with the technical tools and methods commonly employed. Our rigorous curriculum encompasses all these aspects and prepares our students for their experiential learning through internships, exchange programmes and community service projects.

WHY SMU SCHOOL OF ECONOMICS?

Impressive Career Placements

The strength of our programme is demonstrated by our graduates' success in their job placements and development in career paths that include banking and finance, consulting, media, communications, retail, real estate, IT, manufacturing, shipping and the public sector. Our graduates are employed in top local and global organisations that include Goldman Sachs, Credit Suisse, Singapore Stock Exchange, Development Bank of Singapore, Citibank, McKinsey, PricewaterhouseCoopers, Bain, Accenture, Ministry of Finance, Monetary Authority of Singapore, Ministry of Health, Ministry of Trade and Industry and Singapore Economic Development Board, amongst others.

Our graduates also pursue their postgraduate studies in leading universities around the world, including:

- Columbia University
- London School of Economics and Political Science
- New York University
- Northwestern University
- Oxford University
- University of Michigan
- University of Minnesota
- University of Pennsylvania – Wharton School
- University of Southern California
- University of Washington

WHAT IS ECONOMICS?

Economics is a science concerned with human behaviour and it intersects many areas of study and application such as Biology, Business, Climate Sciences, Data Analytics, Engineering, Finance, History, Law, Medical Sciences, Politics, Psychology, Sociology and Urban Planning.

Economics uses a unified approach that allows us to answer a variety of exciting questions. Social systems such as markets, corporations, parliaments and households are analysed under the assumption that individuals forming them are goal-oriented and make calculated decisions. In other words, economics teaches how apparently complex systems become understandable on the basis of the individual incentives that people have.

Examples of economic questions are: What can be done to ensure that the insurance premiums of older workers are not ten times the premium of young workers? When is collusion in auctions more likely to arise? Why do working individuals pay more, for the same good, than seniors or students? Does higher pay attract better politicians? Does democracy cause economic growth or does economic growth foster democracy? How do we explain housing price differences across cities and across different locations within a city?

Economics allows for precise answers, thanks to the use of mathematics and, whenever possible, data, field experiments and policy experiments.

Economic analyses frequently contain policy recommendations that are designed to improve outcomes for society.

Economics is about solving problems and improving people's lives. In this respect it is very relevant to tomorrow's world and it opens broad career opportunities: from policy making to consulting and running your own company.

Studying economics also provides a hedge in our digital revolution era. With the radically improved computation infrastructure and the availability of big data, the discipline has changed. A core part of the training of an economist focuses on the ability to use these data. Such a skill will help companies and decision makers in making better decisions.

The School of Economics faculty are research-active and teaching-focused, and they bring the latest advances in their various fields into the classroom.

RESEARCH HIGHLIGHTS

The School of Economics is one of Asia's leading research schools with a faculty recognised internationally for their contributions to economic research.

GROWING THE ECONOMIST'S TOOLKIT

Assistant Professor Zhang Yichong conducts research in econometrics, the branch of economics that combines economic theory, statistical inference methods, and mathematics to quantify economic relationships. In particular, he specialises in developing new statistical methods for econometrics. In a study titled 'Extremal Quantile Treatment Effects', Professor Zhang established a new method and applied it to birth data to examine the effect of maternal smoking on the lower tail of babies' birth weights.

Zhang Yichong
Assistant Professor

FINANCIAL RISK CAN LEAD TO GREATER RISKS FOR STOCK INVESTORS

Practice Professor Chow Hwee Kwan conducts research on cross-border linkages between stock markets. This is particularly important and relevant in the light of freer flows of global capital. In recent research, she showed that the susceptibility of individual Asian stock markets to volatility transmitted from other markets is linked to its degree of openness. She also found that equity markets in the region are becoming more important emitters of financial shocks since the 2009 Global Financial Crisis.

Chow Hwee Kwan
Practice Professor

VIBRANT STUDENT LIFE

There are over 100 clubs and societies at SMU catering to each and every unique interest. Students may participate in enriching co-curricular activities relating to arts and culture, sports, special interests and community service.

ACHIEVEMENTS AND AWARDS

- Champion, Singapore Merger and Acquisitions Case Competition 2016
- Winner, Frost & Sullivan Case Challenge 2016
- Winner and 1st Runner up, Value Chain Case Challenge (VCCC) 2016
- 1st runner-up, National Maritime Case Competition 2017
- 1st runner-up, Leveraged Buyout Case Competition 2017
- Champion, Thammasat Undergraduate Business Challenge (TUBC) 2017
- Champion, Global Business Case Challenge (GBCC) 2017
- Ruth Chiang Outstanding Intern of the Year Award 2017
- Gold Award, SMU Excellence in Student Life Awards 2018
- Bronze Awards, SMU Excellence in Student Life Awards 2018
- SMU Outstanding Achievement in Student Life Award 2018
- Silver Awards, Tan Tee Chee & Tsan Kah Ngooh Excellence in Student Life Awards 2019
- Bronze Awards, SMU Excellence in Student Life Awards 2019
- SMU Outstanding Achievement in Student Life Award 2019

CORE CURRICULUM

The SMU Core Curriculum is a menu of twelve carefully selected course units (CUs) to initiate undergraduates into their journey to become holistic SMU graduates. The Core Curriculum also serves as a means for students across all disciplines to bond through a common intellectual experience. It stands on three pillars of learning, or inter-related paths of development: Capabilities, Communities and Civilisations.

CURRICULUM

Core Curriculum
(12 Course Units)

Economics Core
(9 - 10 Course Units)

Economics Electives
(5 - 6 Course Units)

Free Electives
(9 Course Units)

INTERNSHIP AND COMMUNITY SERVICE

SMU is introducing one academic credit for internships of 10 weeks or longer. The internship requirements will be enhanced to include elements such as a revamped Finishing Touch career-preparatory programme, guided reflection journals and an internship report.

The enhanced credit-bearing Community Service programme will impart service learning knowledge and equip students with skills to conduct critical needs analysis and asset mapping, so as to help you provide more impactful and sustainable service to the community.

GLOBAL EXPOSURE

Academically, gaining a first-hand, real-world perspective of issues learnt in the classroom serves to deepen students' learning and knowledge application. More importantly, the journey builds independence, empathy, open-mindedness, not to mention soft-skills like communication and teamwork. You have the opportunity to participate in global experiences like international exchange programme in any one of our 231 partner universities across 46 countries.

ECONOMICS CURRICULUM STRUCTURE

Our Bachelor of Science (Economics) is a 4-year programme. It is carefully designed to provide you with a strong understanding of modern economic theory, inculcate independent thought about economic policies and problems, develop the capability for quantitative research, and provide descriptive knowledge about the local and global economies. The programme consists of the Economics Core (9-10 courses), Economics Electives (5-6 courses), and Free Electives (9 courses).

ECONOMICS CORE

The Economics Core lays a broad foundation for the study of economics. It has 9-10 compulsory courses:

ECONOMICS ELECTIVES

Economics Electives provide you with specialised knowledge in various fields of economics. A total of 5-6 courses must be completed.

The set of Economics Electives is a rich menu of courses offering a wide range of topics to choose from. Some examples are:

- Advanced Macroeconomics
- Advanced Microeconomics
- Data Science with R
- Development Economics
- Economic Dynamics
- Economic Growth
- Economic Forecasting
- Economics of Ageing
- Empirical Industrial Economics
- Environmental Economics

- Family and the Society: Economic Theories and Practices
- Game Theory
- Health Economics
- Healthcare Management
- Health Systems and Policy
- Industrial Organisation
- Intermediate Econometrics
- Introductory Data Analytics in Healthcare
- Labour Economics
- Macroeconomics of Income Distribution

- Monetary Economics
- Organisational Economics
- Political Economy of Globalisation
- Public Sector Economics
- Real Estate Economics
- Statistical Inference for Data Science
- Statistical Learning with R
- Strategic Thinking
- The Economics of Politics
- Urban Economics and Policy

FREE ELECTIVES

A total of 9 courses must be completed in this category. You may choose courses from among Economics Electives or Free Electives from any of the other schools for which you satisfy the prerequisites.

SPECIFICALLY DESIGNED PROGRAMMES AND ECONOMICS HONOURS

Within the Economics major, there are some specifically designed combinations of courses.

QUANTITATIVE ECONOMICS TRACK

The Quantitative Economics Track (QET) is designed to respond to the increasing demand from industry, government and academia for graduates with the knowledge and skills required for technical analyses of economic situations and issues. This track is ideal for students who are interested in:

- 1) becoming professional economists in the government or private sectors;
- 2) pursuing a more technical career path in industry;
- 3) pursuing graduate studies in Economics or in Finance; or simply increasing the scope and depth of their knowledge in the quantitative aspects of Economics.

The choice of Economics courses is guided to place more emphasis on the development and application of quantitative methods. Students who opt for this track will take the more quantitative international economics options which provide the training for conducting in-depth analysis of international trade and finance issues, while a deeper foundation in economic analysis and a higher level of technical competency will be achieved through advanced courses in the core areas of microeconomics, macroeconomics and econometrics.

The compulsory courses for the QET are the following 5 courses:

- 1) International Trade
- 2) International Macroeconomics
- 3) Intermediate Econometrics
- 4) Advanced Microeconomics
- 5) Advanced Macroeconomics

REAL ESTATE TRACK

The Real Estate Track (RET) is designed to provide students doing Economics and/or Finance majors the opportunity to widen and deepen their knowledge and understanding of real estate. Students will be able to leverage the fundamentals of Economics and Finance and acquire the quantitative and qualitative tools necessary for a variety of roles in the sector, such as real estate development, advisory, research, leasing, financing, property/project management, Real Estate Investment Trusts (REITS) management, investment banking, consulting and agency management.

The RET aims to develop a pipeline of graduates who will be equipped with a strong grounding in real estate investment and finance. They will be familiarised with real estate development in Singapore and the region. The track fits in well with the national objective to develop more talent and skillsets needed to advance Singapore as a hub for real estate financing for the region and participate in China's "One Belt, One Road" initiatives.

The track is complemented with exposure to real-world business practices, case studies and experiential learning opportunities, such as speaker events, local and overseas internships, as well as local and overseas study trips. In addition, bond-free academic awards will be offered to students.

The requirement of the RET is the following 5 courses relevant to the real estate industry, including 3 compulsory courses:

- 1) Real Estate Investments and Finance
- 2) Real Estate Economics
- 3) Law of Real Estate
- 4) Minimum 2 electives from a specified set of courses relevant to the real estate industry

ECONOMICS HONOURS PROGRAMME

To be enrolled in the Honours programme, you must have achieved a GPA of at least 3.40 in a specified set of Economics courses. You must complete the Senior Thesis (equivalent to 2 course units) and additional Economics Electives while maintaining a GPA of at least 3.40 in this set of courses.

SECOND MAJORS

You may also choose a second major within the School of Economics, in Actuarial Science, Data Science and Analytics or Health Economics and Management or select a second major from one of the other schools. Examples of second majors include:

- Accounting
- Actuarial Science
- Communication Management
- Data Science and Analytics
- Finance
- Health Economics and Management
- Information Systems
- Legal Studies
- Marketing
- Organisational Behaviour and Human Resources
- Political Science
- Psychology
- Sociology
- Sustainability
- Quantitative Finance

SECOND MAJOR IN ACTUARIAL SCIENCE (ACS)

Actuarial Science applies rigorous probability and statistics models to the analysis and management of various risks in business, which includes life insurance, non-life insurance, and enterprise risk management of all corporations. The ACS major provides multidisciplinary training on probability, statistics, finance, economics, risk management, and predictive modelling, etc. The ACS curriculum meets all the objectives listed in Validation for Education Experience (VEE) guidelines under the US Society of Actuaries (SOA) and prepares students for the professional credentials under SOA as an actuary, i.e. Associate (ASA) and Fellow (FSA), as well as an enterprise risk analyst i.e. Chartered Enterprise Risk Analyst (CERA).

SECOND MAJOR IN DATA SCIENCE AND ANALYTICS (DSA)

The increasing volume of data and advanced data technologies pose new opportunities as well as challenges for data analysts to transform data to useful information for decision-making. In order to provide a rigorous training for students to develop appropriate data analysis skills, the DSA major emphasises applications of data visualisation, statistical modelling, computing and information technology as well as simulation and predictive approaches to solve real-life problems in all private and public institutions. The DSA curriculum adopts a hands-on and comprehensive pedagogy in both statistics and computer science, focusing on statistical software applications of big data analysis related to Economics, Social

Sciences, Finance, Risk Management, Business, Insurance, etc.

SECOND MAJOR IN HEALTH ECONOMICS AND MANAGEMENT (HEM)

The second major in Health Economics and Management (HEM) centres on the healthcare industry, one of the largest and fastest-growing industries. Students in the HEM major will learn essential knowledge and skills for all high-level healthcare professionals, hone them through experiential learning, and develop first-hand understanding of the healthcare environment through internship. The HEM major opens the door to meaningful career paths in the healthcare industry and is suitable for those with a passion for promoting health and wellbeing, delivering quality healthcare, contributing to the saving of lives, and ensuring graceful ageing of a society.

DOUBLE DEGREE

The double degree programme provides students with added flexibility in their career options. Under the double degree programme, a student can graduate with two degrees in:

- Economics and Accountancy
- Economics and Business Management
- Economics and Computer Science
- Economics and Computing & Law
- Economics and Information Systems
- Economics and Social Sciences
- Economics and Law (Law must be the primary degree)

TESTIMONIALS

“I benefitted from SMU School of Economics' undergraduate curriculum in many ways. The seminar-style teaching allowed me to clarify doubts and engage in discussion easily. Group work allowed me to get to know many of my peers, as well as adapt to different working styles. The requirement to take many different kinds of courses outside of my major also helped me. For example, a programming course I took provided me with many skills I used in my graduate studies and in my first job. I was also fortunate to have the flexibility to set up an undergraduate research club (SEIC, or SMU Economics Intelligence Club) together with several of my peers, which made them my lifelong friends. Finally, I also gained valuable overseas experience through exchange and overseas community involvement projects”.

Leung Weiwen
Economist, Amazon
Graduated in 2013

Natalie Ng Yun Yi
Analyst, Partners Group
Graduated in 2018

“Joining SOE was one of the best decisions I made in my life. Its flexible curriculum meant there was more freedom to plan my own development goals accordingly. Going through the SOE curriculum has invaluablely added onto my analytical and reasoning skills. It also offered an immensely diverse education experience – from student demographics, course tracks to internship opportunities. Using SOE as a platform, I was fortunate enough to have secured multiple internships including a 10-week stint in China. I strongly believe these experiences will continue to help in my professional development. ”

Lim Xue Yan, Marilyn
Commercial Graduate, BHP
Graduated in 2019
